

Electromagnetic emissions were judged by the Guide Values of the Swedish TCO-Standard. Measurements according to the standard in 30 cm above the gadget / mat or pad: < 0,5 V/m. In the frequency band 1 (5 Hz to 2 KHz) the TCO-Directive provides an maximal value of 10 V/m.

| Power plug   | Gadget       | PEMF type | Applicator | Connector Type | Electric field strength V/m (5 Hz - 1 MHz) |
|--------------|--------------|-----------|------------|----------------|--|
| Disconnected | Switched off |           |            |                | 0,3  |
| Connected    | Switched off | QRS home  | Pad        | Schuko         | 3  |
|              | Switched off | BEMER     | Pad        | Flat plug      | 646  |
| Connected    | Switched on  | QRS home  | Pad        | Schuko         | 3  |
