

## **VEMI/PEMI Explainer Video Script**

Simple is best. Nowadays, complex wellness systems add unneeded stress and who needs that? Especially when your clients look to you for solutions to their health goals and challenges.

We know how important their wellness journey is and we have made it effortless for you and your clients to transcend wellness.

As innovators in the science of cellular health and longevity we at Purewave have created a powerful 3 in 1 bioenergy system that envelopes the body in millions of gentle harmonic frequencies, which helps to reset, restore and rebalance the integrity of the biological system.

### **Meet the VEMI:**

The world's first biosynchronizer bed powered with Vibroacoustic, ElectroMagnetic and Infrared technologies. The VEMI is the only luxury energy system that uses advanced multi-layered acoustic waveforms and biostacked therapies to provide the individuals' body with the opportunity to achieve cellular and electrical coherence - restoring ultimate wellness.

Let's take a closer look at the three natural modalities.

### **Vibroacoustics.**

The VEMI is so much more than a regular less-developed vibroacoustic bed. There is no comparison.

The vibration experience is enhanced with millions of audio frequencies and the bed is engineered to float the body. Feeling the music helps the body come into harmony physically, mentally, emotionally, and spiritually through stimulating the feeling senses. This full-body entrainment helps the mind and body to expand awareness.

### **Electromagnetics**

Time and space disappear when your whole body is enveloped with millions of gentle electromagnetic frequencies. Using specific frequencies and vibrations, the unique combination and layering bio-synchronizes the body's biofield to reach deep levels of relaxation, full-body coherence and a profound reset that lasts and builds upon itself.

### **Infrared heat**

Experience a deep feeling of warmth and release with this gentle energy that helps with detoxification. Frequency waves penetrate up to three inches deep to help provide immense relief to muscles and internal organs, as well as improve lymphatic flow, increase blood flow and circulation and reduce tension and stress.

We have stacked three of the most effective biohacking technologies that are carefully calibrated and synced to support the body's natural electrical system, to help restore overall coherence, vitality, calm and peace. One 30-minute session will give you the ability to have the ultimate feeling of relaxation and energy restoration.

Check out what our customers have to say about the VEMI.

There are thousands of people who have had amazing results with the VEMI and you can too.

### **How does it work?**

Our bodies comprise trillions of subatomic particles, which include electrons, protons, and neutrons. Each of these particles have a pattern of spin that generates energy waves.

Imagine trillions of particles spinning in concert together. The sum pattern of all of these waves emanating from the particles in our body, create a biofield. The biofield is a field of electromagnetic energy that surrounds and interpenetrates the human body.

Ultimately, the biofield informs the physical, mental, and emotional aspects of the human body. Our cells exchange information to regulate body functions through sending and receiving specific frequencies. This cell signaling precedes and regulates all biochemical actions.

When these natural frequency signals become scrambled, so does our body's ability to self-regulate and maintain healthy function. This disruption can occur because of the introduction of things like certain viruses, toxins, heavy metals, radiation, and harmful electromagnetic fields.

When unhealthy frequencies, such as WiFi signals, disrupt cellular function and alter the cell's vibration then its ability to send, receive, and accurately interpret signals is compromised - incoherence will manifest.

### **So what is Incoherence?**

An incoherent biofield has Particle-wave patterns that are "in chaos" with one another. It reflects a body that is "out of tune" with unhealthy patterns.

A Coherent biofield has particle-wave patterns that are "synchronized" with one another. It reflects a body that is "in tune" with healthy patterns.

When multiple modalities and therapies are combined they can create incoherence. We don't use any frequencies above the body's normal frequencies. This is what makes us stand out from the rest. Our extremely gentle Pure Waves mimic the frequencies of the body.

**Now that is a true biohack.**

The VEMI bio-synchronizes the biostacking of three effective modalities with frequency waveforms that target areas in the body that are low in cellular voltage. The bio-synchroniation acts like a conductor syncing all the cells, tissues and body parts to vibrate at all the same time with the same intensity.

Every VEMI ride is a reflection of your wellness evolution. Your body is only going to do what it is capable of, so no two experiences are the same. The VEMI is the perfect wellness device to uplevel your personal growth and bio-physiology. It can literally launch you to the next level of your wellness journey.

**But don't stop there!** PureWave offers a home cellular system - the PEMI Portable Electromagnetic Induction system - where you can continue to build the perfect foundation of health every day.

By using it twice a day for at least 20 minutes each time, It restores the body's cellular function in a natural way by using Extremely Low Frequency (ELF) programs that are equivalent to the body's frequencies. Our PEMI technology helps the body to increase circulation, blood flow, oxygen, removal of toxins and stimulates the metabolism.

Our bioenergetic system gets lasting results from the following standout features:

**It Mitigates Electrosmog.**

A patented process removes interfering fields, which creates an optimal environment for the device to work most effectively. Most all man made electronic devices give off an emission of dirty electricity "harmful emfs". The World Health Organization's recommended safety exposure level is 10 millivolts or less. Other PEMFs emissions are in the 1000's, that's like laying on a mat with hundreds of activated cell phones on top of you! Our PEMI gives off ZERO emissions and is free of those harmful emfs.

**The PEMI also** increases the energetic charge of a cell by **improving the cell's ATP production** through a process of **ion transport regulation**. This process enhances the efficiency in which charged molecules or atoms (energy) are received from, food, water and air. These ions enter the cell walls more easily and bring the provided nutrients to be metabolized, which creates ATP in large amounts. **It also helps to Improve Circulation and Waste Removal.**

PureWave's VEMI and PEMI systems work in conjunction with one another providing the most simple but effective touchless therapies on the market. Like you, we are passionate about creating the perfect, effective, wellness journey.
